Olena Tesla

Research Assistant at Columbia Fusion Research Center
Berkhamsted, England, United Kingdom

Summary

I'm a student at Columbia University, excited about bioinspired and modular/swarm robotics. Looking forward to applying my skills in the research or design industry this summer!

Experience

Columbia Fusion Research Center
1 year 1 month

Undergraduate Research Assistant at CUTE
June 2026 - Present (4 months)
New York, NY

Developing control and power systems for Columbia University Tokamak for Education.

- Conducted low voltage testing on the capacitors banks set up and safety circuits.
- Wired up high voltage power supply and the capacitor banks.
- Tested modifications of the control system and established a network connection with the oscilloscope.

Undergraduate Research Assistant at CSX
September 2025 - May 2026 (9 months)

Columbia Stellarator eXperiment at the Fusion Research Center.

- Modeled a rotating stand for winding of full-scale interlocked coils.
- Developing a Hall probe-based magnetic field sensor and assembling the Stellarator Experiment.
- Collaborated in assembly of the vacuum chamber setup, CAD modeling, and machining.

Columbia Engineering
Laboratory Assistant
September 2026 - Present (1 month)
Signals and Systems

Ukraine Global Scholars

5 years 4 months

Co-Mentor

June 2022 - Present (4 years 4 months)

Advised 4 high school students in the application process to international and US boarding schools and colleges; conducted weekly meetings, answering the questions and guiding them through the process.

Helped 10+ applicants yearly to the universities and boarding schools, reviewing their essays and other application materials, 10+ hours a week.

Admission Officer

April 2022 - Present (4 years 6 months)

Ukraine

Interviewed and assessed 50+ applicants through the three-stage selection, 2024-now

Reviewed 60+ applications for the first admission stage to the Ukraine Global Scholars, 2023

Mentored 6 students during the 2-week boot camp, giving feedback on their profiles, essays, and CVs draft, 2022

Created a mathematical test for a second admission stage to the Ukraine Global Scholars, 2022

Finalist

June 2021 - Present (5 years 4 months)

Ukraine

One of 54 Ukraine Global Scholars finalists out of 550 applicants selected through a rigorous 3-stage

selection process focusing on academic skills, extracurricular achievements, and character.

BRAVE1

Intern

June 2026 - September 2026 (4 months)

Worked in the components department, conducting 10+ interviews and questionery with 40+ respondents to collect data on current demand and supply chain. NDA for further details.

Columbia University

Reunion Student Worker

May 2026 - May 2026 (1 month)

New York, NY

Freelance

Graphic Designer

March 2021 - April 2024 (3 years 2 months)

Developed the website design and the content for the Progressive News project that publishes stories about talented Ukrainian youth and news about opportunities for teenagers.

Designed a logo for a dance theatre with 200+ participants.

Contribute to design and discussions about it in other (usually one-time) projects.

Epicure Artisan Coffee

Cafe Assistant

April 2023 - July 2023 (4 months)

Berkhamsted, England, United Kingdom

Worked 8+ hours every Sunday, on front and back house.

Took and served 50+ orders per day, preparing basic drinks, cleaning kitchen and tables.

Junior Academy of Sciences

Member

June 2020 - November 2022 (2 years 6 months)

Ukraine

"Technology of the production of pulp and paper fiber with the usage of non-wood materials", 2021-2022:

- won the regional stage in the biggest Ukrainian research competition;
- became a finalist in the national stage of international competitions such as the International Science and Engineering Fair, the GENIUS Olympiad, and InventorUA.

"The system for remote monitoring of plant growing conditions for a home micro-farm", 2020-2021:

- won 8th place among 500+ students in the biggest Ukrainian national research competition;
- presented the work to multiple conferences; spent 50+ hours per week working on the research.

Attended online summer schools in Astronomy, Physics, Mathematics, Robotics, Chemistry, and Biology.

FIRST Robotics Team 8504

Engineer

October 2020 - March 2022 (1 year 6 months)

Dnipro, Dnipropetrovsk, Ukraine

Spearheaded the team in winning the Rookie Game Changer Award (10,000+ international squads). Developed the transmission part of the robot and assembled the primary computer-aided design model (650+ parts); participated in the engineering part of robot construction.

Education

Columbia University

Bachelor of Science - BS, Electrical Engineering · (September 2024 - May 2028)

Berkhamsted School

A-levels: Further Maths (A), Physics (A), Computer Science (A), Maths (A*) · (September 2022 - June 2024)

Liceum profilowane - gmina Środa Śląska

· (March 2022 - June 2022)

Lyceum of Finance and Economics

High School Diploma · (September 2018 - June 2022)

Dnipro Art School

· (September 2015 - June 2019)
